BEKDIYOR ABDUSHARIPOV

ANDROID DEVELOPER

+998 99 500 61 23 | abekdiyor@gmail.com | Telegram: @bekdiyor04

Android Developer with 3+ years of commercial experience building and maintaining production mobile applications. Strong background in Kotlin, Jetpack Compose, XML, MVVM, Hilt, Retrofit, Socket.IO, Firebase, Mapbox and Media3/ExoPlayer. Experienced across taxi, delivery, courier, restaurant and video-streaming products, including applications with 50K+ users. Also led a freelance mobile team while owning Android development for a creator-focused social platform.

TECHNICAL SKILLS

Languages: Kotlin, Java
UI: Jetpack Compose, XML, Material Design, custom UI components
Architecture: MVVM, Clean Architecture, multi-module projects, Repository pattern
Android: Coroutines, Flow, Navigation, Paging 3, WorkManager, foreground/background services
Networking: Retrofit, OkHttp, REST APIs, Socket.IO
Dependency Injection: Hilt, Dagger
Data & Backend: Firebase, Firestore, Room, DataStore, FCM
Maps & Media: Mapbox, Media3/ExoPlayer, HLS video streaming
Tools: Git, GitHub, GitLab, Postman, Figma

WORK EXPERIENCE

Android Developer — Jul 2023 - Present

Megasoft LLC

- Develop and maintain production Android applications using Kotlin, Jetpack Compose and XML.
- Build features with MVVM, Coroutines, Flow, Hilt, Retrofit and modular Android architecture.
- Implement real-time order, trip and delivery updates using Socket.IO and Firebase Cloud Messaging.
- Integrate Mapbox, Media3/ExoPlayer, background services and device-specific Android capabilities.
- Collaborate with backend developers, designers and QA engineers to deliver features and resolve production issues.
- Contribute across MegaGO, MegaGO Driver, Foodly and MegaFilm products.

Freelance Android Developer - Part-time — Jun 2023 - Present

Independent / Contract Projects

- Build end-to-end Android applications for startups and local businesses, from architecture and UI implementation to API and Firebase integration.
- Develop and maintain creator, real-estate and educational mobile products using Kotlin and Jetpack Compose.
- Coordinate directly with clients and cross-functional contributors to define requirements, plan releases and deliver production-ready features.

Java Developer Intern — Oct 2019 - Apr 2021

Mustafo Software

- Studied and applied Java Core, MySQL and Spring Boot fundamentals.
- Contributed to the SmartSchool project and gained experience working within a software development team.

SELECTED PROJECTS

MegaGO Super App | Taxi user and driver ecosystem | 50K+ users

- Developed and maintained taxi, delivery and service-booking flows for customer and driver applications.
- Implemented real-time order and trip state updates with Socket.IO, push notifications and background services.
- Integrated Mapbox for location selection, route display, map interactions and driver-related workflows.
- Built Compose-based screens, navigation flows and reusable UI components for a multi-service product.

Foodly | Food delivery ecosystem: customer, courier and restaurant apps

- Worked across three connected applications covering ordering, restaurant operations and courier delivery.
- Implemented real-time order status handling, foreground location/service behavior and push-notification flows.
- Developed production UI and business flows with Kotlin, Jetpack Compose, Retrofit, Hilt and Socket.IO.

Hashtagram | Freelance project | Mobile Team Project Manager & Android Developer | Mar 2026 - Jul 2026

- Led the mobile team and coordinated feature planning, task distribution, delivery priorities and communication with other project contributors.
- Owned Android development for a creator-focused social platform where users can promote, sell and grow their creative work.
- Built core Android screens and integrations, helped align mobile implementation with product requirements, and supported release preparation.
- Combined project coordination responsibilities with hands-on Android engineering throughout the project.

Kvadratmetr | Freelance real-estate application

- Built a Jetpack Compose application for browsing construction companies, projects and homes for sale in the Khorezm region.
- Implemented Firebase Firestore and Storage integration, image uploads, filtering, story-style content and admin CRUD flows.
- Designed offline-friendly state handling, reusable UI components and multilingual application content.

MegaFilm | Mobile and Android TV streaming application

- Supported the lead Android developer by implementing and improving selected product features.
- Worked with Jetpack Compose, Media3/ExoPlayer, navigation and streaming-related UI for mobile and TV experiences.
- Assisted with feature integration, debugging and maintenance within the existing application architecture.

EDUCATION

Master's Degree in Software Engineering — **2023 - 2025**

Tashkent University of Information Technologies, Urgench Branch

Bachelor's Degree in Software Engineering — **2019 - 2023**

Tashkent University of Information Technologies, Urgench Branch

Android Development Course — **2022 - 2023**

Fulfill Education

LANGUAGES

Uzbek: Native **English:** B2 - Upper-Intermediate
